# AN/ALQ-184 2 Band Short ECM Pod

item  
01

The AN/ALQ-184 Electronic Counter-Measure (ECM) pod is a self defense pod used on USAF tactical aircraft. It operates in both receive and transmit modes to selectively direct high power jamming against multiple emitters. The ALQ-184 is available in two- (Mid & High) and three- (Low, Mid, & High) band configurations.

From 1989 to 1996, more than 850 ALQ-184 pods were delivered to the USAF, and first used operationally in the 1991 Operation Desert Storm. The ALQ-184 short 2-band pod is most commonly used by ACC units, while the ALQ-184 long 3-band is used by PACAF units, and the ALQ-131 deep 3-band pod is used by USAFE units.
